It is with great pleasure that I announce that the time has come for our 10th Congress of the Brazilian Society of Endodontics – SBEndo. The first edition of this event took place in São Paulo, in 2009. Since then, several cities have already hosted it competently and brilliantly. Great names in Brazilian Endodontics have presided previous annual editions. The renowned Professor Dr. Manoel Eduardo de Lima Machado, associate professor of Endodontics of the School of Dentistry of the University of São Paulo, was the President of the Society for 8 years. He played a very important role in its creation, structure and development.

In 2017, another great name in Endodontics became President of the Society, Professor Dr. Marco Antonio Hungaro Duarte, full professor of Endodontics at the Bauru School of Dentistry of the University of São Paulo and one of the editors-in-chief of the Dental Press Journal of Endodontics. Over 5 thousand participants from all Brazilian and Latin American regions have attended this event. Professors from several countries have taught classes during this event, discussing and contributing to the development of clinical Endodontics based on scientific evidence.

This year, the charming and welcoming city of Gramado, in the state of Rio Grande do Sul, will host the event, under the guidance of Professor Dr. Marcus Vinícius dos Reis Só, who is an associate professor of Endodontics at the Federal University of Rio Grande do Sul. The scientific timetable will have 32 nationally and internationally renowned lecturers. Their presentations will be grouped according to topics, such as: The influence of

endodontic treatment in restorative Dentistry; Bringing science closer to the clinical dentist; The inter-relation of Endodontics and systemic health; Does heat treatment of instruments make a difference? Recent advances in filling materials; and Searching for excellence in Endodontics. Moreover, hands-on activities including different techniques will be conducted during all the event days.

Gramado is a city in the state of Rio Grande do Sul, Brazil. It is in the mountains of this state, more precisely in the so-called Region of Hydrangeas, at an altitude of 830 meters. Its population was estimated at 35 thousand in 2017. Demographically, its ethnic diversity reflects an important influence of German and Italian cultures on its culinary scene and its urban and rural architecture. Its economy is based on tourism, and the city receives millions of Brazilian and foreign tourists every year.

This great event, held in an incredible city, will certainly be unforgettable. See you soon! Warm regards.
