Editorial Technology

I often call people (teachers) who alarm others about everything as “chaos advertisers”. You know them because they are always saying, “The end is near”! “Chaos is imminent”! “Dentistry has already changed, and if you don’t follow it, you’re out”! Something in that line.

I wrote about this topic a few days ago on Instagram and said technology should come benevolently, and it does. It comes with interesting applications that make you interested in ease and advantages, and it happens naturally. I mentioned in the text the question of the mobile device; at first it was just for making calls like the Motorola old (huge, by the way). The Nokia launches, in 1993, a mobile phone “capa-
